5	Other Caregiver Services (Non-Registered)	Caregiver	No	Aggregate

#### NOTES

- 1) Some services that appear on the chart above are not included on the current NAPIS Client Registration Form. This is most often because: they have been combined into another, more comprehensive service standard; they are seldom or no longer used; and/or they originate from a AAA regional service definition.
- 2) Client Registration is defined as the requirement that an attempt is made to collect information contained on the NAPIS Client Registration Form. This information then entered into the NAPIS 2.0 software application for each individual client.
- 3) Service units are either reported at the *client-level* (defined as entering service units for individual client records in the NAPIS 2.0 software application) or in the *aggregate* (defined as entering aggregate unit counts at the service and vendor-level).
- 4) Aggregate Cluster 5 caregiver units are entered for caregivers caring for *care recipients* (i.e., non-grandchildren and/or individuals age 18 and older) or for caregivers caring for *grandchildren* or those under age 19.
